📍 No.167 Dediawala, Kalutara North

ABOUT ME

Self-motivated and resourceful Full Stack Developer with over 2 and half years of experience in designing and implementing scalable software solutions. Adept at developing robust backend systems and creating seamless user experiences. to clean, test-driven development. Strong foundation in object-oriented programming and API optimization, with a keen eye for detail and commitment

EDUCATION

BIT (HONS) INFORMATION TECHNOLOGY [TOPUP] - READING

Eurasian Campus Contribute With Nile University Of Science And Technology 2025

HIGHER DIPLOMA IN INFORMATION TECHNOLOGY

Sliate 2018 - 2020,Tangalle

WORK EXPERIENCE

Software Engineer

BEYOND IT SOLUTIONS (JAPAN) SEPTEMBER 2023 – PRESENT

- Developed efficient backend systems with Laravel, ensuring robust and scalable API implementations.
- Streamlined deployment processes using CI/CD pipelines to enhance delivery efficiency.
- Conducted thorough testing and debugging to maintain high code quality and data integrity.
- Collaborated with frontend teams to integrate backend functionality for responsive application architectures.
- Managed databases using MySQL, ensuring optimal performance and reliability.

Associate Software Engineer

STEPHEN INNOVATION PVT LTD [NOVEMBER 2021 – APRIL 2023]

- Designed and developed functional databases, applications, and servers to support dynamic websites.
- Implemented RESTful APIs to ensure seamless communication between frontend and backend components.
- Developed server-side logic and APIs using Express.js for efficient and scalable backend operations.
- Leveraged technologies like PHP, SQL, and Bootstrap for effective application development.
- Improved code quality by implementing unit tests and automation

SKILLS

Programming Languages & Frameworks

- Laravel, PHP, Java, JavaScript, Vue.js and jQuery
- HTML, CSS, Tailwind CSS, Bootstrap

Database Management

- MySQL

Tools & Platforms

- AWS,CI/CD Pipelines, GitLab, GitHub, Jira, Confluence

Methodologies

- Scrum, Agile Development

KEY ACHIEVEMENTS

- Software Architecture Improvement: Designed and implemented scalable software architectures, improving.
- API Optimization: Optimized existing APIs for better performance and reliability, ensuring seamless integration system reliability and efficiency with frontend systems.
- Team Collaboration: Worked closely with cross-functional teams to analyze customer requirements and deliver high-quality solutions.

INTERESTS

- Staying updated with the latest technologies in software development.
- Contributing to open-source projects and enhancing development skills.

ADDITIONAL INFORMATION AND EXPERTISE

- Languages - English, Sinhala
- Other Tools - Canva, MsOffice Suite
